Part 1: Building the BMI Calculator

1.Create an HTML file named "index.html" and add the following code:

```
<!DOCTYPE html>
<html>
 <head>
  <meta charset="UTF-8" />
  <title>BMI Calculator</title>
 </head>
 <body>
  <form>
    <label for="weightInput">Weight (kg):</label>
    <input type="number" id="weightInput" />
    <br />
    <label for="heightInput">Height (cm):</label>
    <input type="number" id="heightInput" />
    <br />
    <button type="button" id="calculateBtn">Calculate BMI</button>
  </form>
  <div id="result"></div>

  <script src="script.js"></script>
 </body>
</html>
```

2. Create a JavaScript file named "script.js" and add the following code:

```javascript
const calculateBMI = () => {
  const weight = document.getElementById("weightInput").value;
  const height = document.getElementById("heightInput").value / 100;
  const bmi = weight / (height * height);

  document.getElementById(
    "result"
  ).innerHTML = `Your BMI is ${bmi.toFixed(2)}`;
};

document.getElementById("calculateBtn").addEventListener("click", () => {
  calculateBMI();
});
```

3. Open the HTML file in your browser and test the BMI calculator.

Part 2: Styling the BMI Calculator

1. Create a CSS file named "style.css" and add the following code:

```css
body {
  background-image: url("https://images.unsplash.com/photo-1587613860803-ec54e39f1b5d");
  font-family: "Open Sans", sans-serif;
  margin: 0;
  padding: 0;
}

form {
  background-color: rgba(255, 255, 255, 0.8);
  border-radius: 10px;
  margin: 50px auto;
  max-width: 500px;
  padding: 20px;
}

label {
  display: block;
  font-size: 1.2em;
  font-weight: bold;
  margin-bottom: 10px;
}
```

```css
input {
  border: none;
  border-radius: 5px;
  font-size: 1.2em;
  padding: 10px;
  width: 100%;
}

button {
  background-color: #6d8c88;
  border: none;
  border-radius: 5px;
  color: #fff;
  cursor: pointer;
  font-size: 1.2em;
  margin-top: 10px;
  padding: 10px;
}

button:hover {
  background-color: #568f8a;
}

#result {
  font-size: 1.5em;
  margin-top: 20px;
  text-align: center;
}
```

2. Add the following code to the head section of the HTML file to link the CSS file:

```
<link href="https://fonts.googleapis.com/css?family=Open+Sans&display=swap" rel="stylesheet" />
```

```
<link rel="stylesheet" href="style.css" />
```

3. Open the HTML file in your browser and check the styling of the BMI calculator.

Part 3: Deploying to Netlify

1. Create a new repository on GitHub and push the index.html, script.js, style.css, and note.txt files to it
